

zSELEX

Basic overview of zSELEX
Please DON'T use this as
base for field types etc.
It's JUST an overview.

List of some of the element types.
This list WILL grow.

The interface between zSHOP, iSHOP, xSHOP and the online shop systems could be more modules.
For ease it's just shown as one module.

The list of online shops is also not complete.
More will definitely come.
